

POCKET RAVE

Belarusian electronic musician and live performer. Kraków, Poland.

hypnotic techno · experimental electro · acid · breakbeat · trance · hardware live act

Inspired by: _____ [add your reference artists here]

Pocket Rave delivers raw, textured electronic music performed entirely on a complex hardware setup — synthesizers, sequencers, drum machines, and samplers with no laptop on stage. Each show is a unique live act: compositions are sculpted and improvised in real time, blurring the line between studio production and stage performance. The sound lives at the crossroads of hypnotic techno, experimental electro, acid, breakbeat, and trance — emotive, physical, and unpredictable. Built for dark dance floors and open-air stages alike.

+ Synchronized live visuals (optional): when venue conditions allow, the set can include real-time generative visuals — a portable video synthesizer programmed in Python produces reactive projections synchronized to the music, turning the performance into a fully immersive audio-visual experience.

Selected performances: Prozak 2.0, Sekta Selekt, Święta Krowa, Pacura Studios, Busz (Kraków); Scena Chmielna (Warsaw). Festivals: Belarus Outside Soundsystem, Varushniak, AUKA, Letucień.

Co-founder of Electronic Live Sessions — a Kraków event series uniting hardware live electronic acts from Belarus, Poland, and Ukraine.
